

# Watering Kit Catalog 2011-2012

**ELGO**™

SAVING WATER SINCE 1906

#### Saves water

Each plant gets the optimal amount of water. Up to 70% water saving. Accurate drippers and micro-sprinklers with uniform coverage. Minimum evaporation and wind effect. Less weeds, no run-off.

#### Keeps plants healthier

Designed to ensure precise irrigation directly to the root zone. The slow flow keeps root zones moister... but not saturated. Plants retain the right amount of water/air balance.

#### Saves time & effort

Tool-free installation within minutes. Simply lay down the tube, attach the "snap-on" connectors and the system is ready to water!

#### Automates watering

Ensures carefree gardening and peaceful vacations... Add a water timer to each kit and ensure automatic, scheduled irrigation. You will be worry free when out of your home...
